

S4 Fig. The net value for the expected time spent on colostrum management for the alternative scenarios, the labour costs S1 and S3, the prevalence of FPT without an intervention ($P_{\text{FPT}t=0}$) of 50% and a market value for dairy of N(330,15) instead of N(125,9).

The dotted lines represent the results with the ranges of the function curve Eff_i (Fig. 2).
