

Table S1

	MST ₅₀ (days)* (95% confidence level)	LC ₅₀ ($\times 10^5$ conidia ml ⁻¹)** (95% confidence level)
Wild type	9.3 (6.8 – 11.8)	41.3 (24.2 – 58.4)
BbsVSP-#181	4.2 (3.4 – 5.0)	3.6 (2.8 – 4.4)

*MST₅₀: median survival time at 1×10^7 conidia ml⁻¹ of spray treatment.

**LC₅₀: lethal concentration causing 50% mortality at 7 days after the spray treatments (1×10^5 , 1×10^6 , 1×10^7 , and 1×10^8 conidia ml⁻¹).
